July 9, 2010

American Contractor & Technology, Inc.
1101 Gulf Breeze Pkwy, Suite 315
Gulf Breeze, FL 32561

Gentlemen:

It is with great pleasure that the Maritime Administration, Division of Gulf Operations, Beaumont Reserve Fleet Safety Office recognizes American Contractor & Technology Inc (ACT) for 24,589 man-hours without a lost time accident from October 01, 2009 to July 9, 2010 while performing work under Contract DTMA2C09001 Hurricane Damage Repairs at Beaumont Reserve Fleet. The work performed under Contract DTMA2C09001 included, although not limited to, demolition of wooden pier, installation of septic system, construction of cement pier, 254' long X 35' wide, installation of fire pump system, installation of storm water filtration system, and construction of training/office building. Though this work provided a myriad of opportunities for safety infraction and the fact that demolition has one of the highest injuries and illness rates in the construction industry your onsite Superintendent Mr. Mike Clawson displayed extraordinary vigilance and the right Culture of Safety adhering to OSHA regulations and Beaumont Reserve Fleet Safety Rules. The 24,589 safe man-hours were made possible through a strong commitment from ACT and Mr. Clawson's part to construction safety through the partnering process, and by fulfilling goals of Maritime Administration Beaumont Reserve Fleet safety program.

X

Timothy Updike
Safety and Occupational Health Specialist
